**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claim 1 and 2 are rejected under 35 U.S.C. 102(a) as being anticipated by Cole et al. (US 7,006,445).

Regarding to claim 1, Cole teaches an xDSL modem used for digital communication through a subscriber line connecting a local switch and a customer premises equipment, and which includes a digital transmitting unit for performing the digital communication using a data signal, the data signal being separated by a splitter from an analog control signal and a speech signal used for a telephone communication by use of an analog transmitting unit, the xDSL modem comprising; an evaluating unit for evaluating, prior to a start of a provision of a broadband communication service, a transmission characteristic of said subscriber line based on an influence deriving from the transmission characteristic of the subscriber line appearing by a reception result of a signal transmitted from said local switch through said subscriber line (Column 6 Line 33-37); and a reporting unit for sending out said transmission characteristic obtained by said evaluating unit to a network through said analog transmitting unit (Column 6 Line 52-56).

Regarding to claim 2, Cole teaches said evaluating unit includes: a requiring unit for sending out a predetermined requiring signal to the network through the analog transmitting unit 302; and an analyzing unit for analyzing the influence deriving from the transmission characteristic of the subscriber line appearing in a reception result of an analog signal according to receipt of a response signal sent back from a provider offering a broadband communication service in response to said requiring signal 303, the analog signal being generated by said local switch directly connected to said xDSL modem and being transmitted through said subscriber line, and for obtaining an evaluation barometer indicating said transmission characteristic of said subscriber line 304.

***Allowable Subject Matter***

3. Claims 3, 4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
4. Claim 5 is allowed.

***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL.**

See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
